Orchids

for the BEGINNER

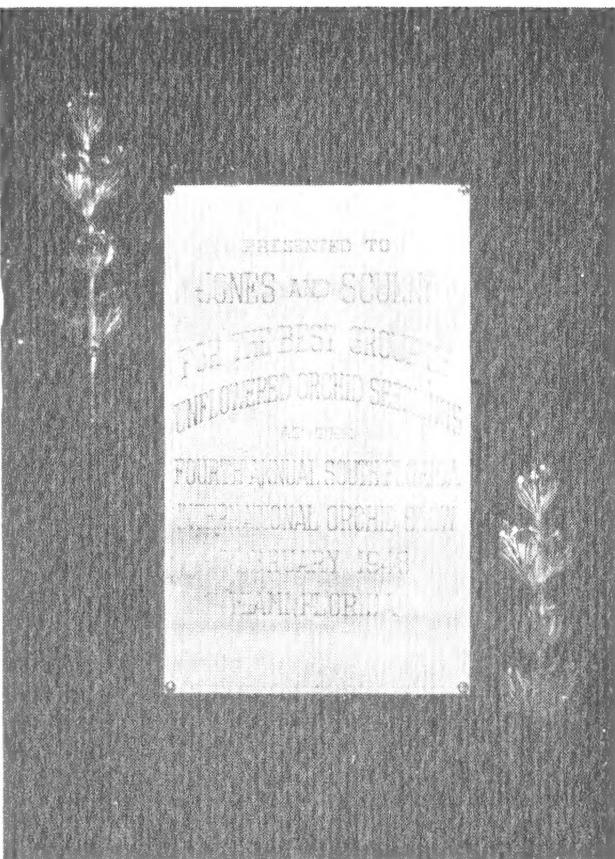

for the AMATEUR

for the CONNOISSEUR

JONES AND SCULLY, INC.
"ORCHIDGLADE"

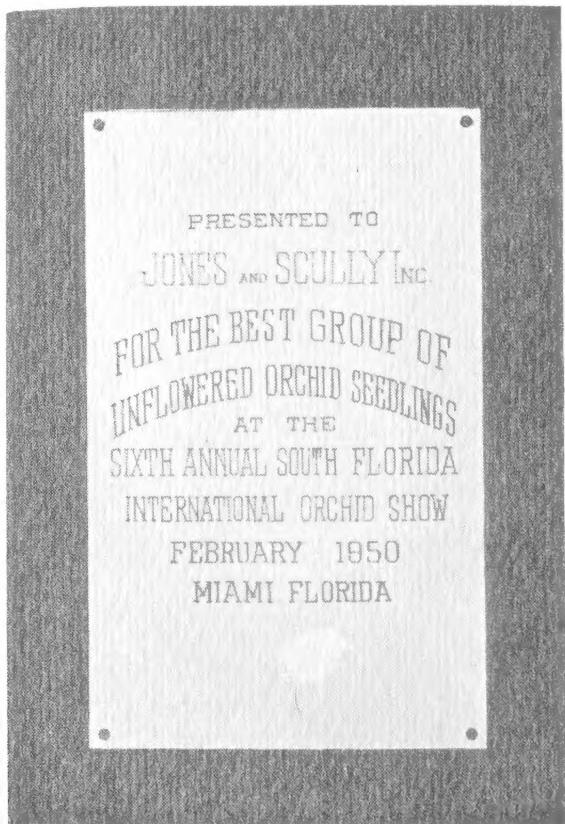

Growers and Hybridizers of Fine Orchids

2154 N. W. 33rd Ave. Miami 35, Fla., U.S.A.

Bronze Plaque 1948

. . . You will notice our seedling prices are lower than those quoted by many northern growers. Twelve months of sunshine and our consequent negligible heating costs account for the difference. We pass our savings on to you!

Bronze Plaque 1950

Seedlings of Cattleya and Allied Genera

THERE IS A DIFFERENCE IN ORCHIDS!—and, unquestionably, our Florida climate with its annual twelve months of sunshine contributes materially to the extreme vigor of our seedlings, and, consequently, to their more than average size. Our stock of seedlings is better than ever this year, and these fine plants will really step ahead for you.

The hybrids which we offer here represent the supreme, and are the results of the work of the leading hybridizers of the world. The parents used were selected for their outstanding qualities—shape of flower, color, texture and, of course, time of flower which is so very important.

It is quite a surprise to the person unfamiliar with the wide range of colors in orchids to discover the great strides that the orchid hybridists have made in the past few years. Now, connoisseurs are seeking the unusual dark colors, those of bronze and lavender shadings, and those having white sepals and petals and brilliant labellums which run the gamut from pale blush through the purples and vivid wine shades.

We wish to advise the amateur grower of the great importance of selecting orchids which represent, generically, the traits which they desire in flowers. As we have pointed out so many times before—poor orchids require the same time to produce as good ones; therefore, it is only common sense to select orchid stock with extreme caution so that you can be justly proud of your plants when they bloom.

If we can be of assistance to you in any way in making your selections, we shall be only too glad to help you.

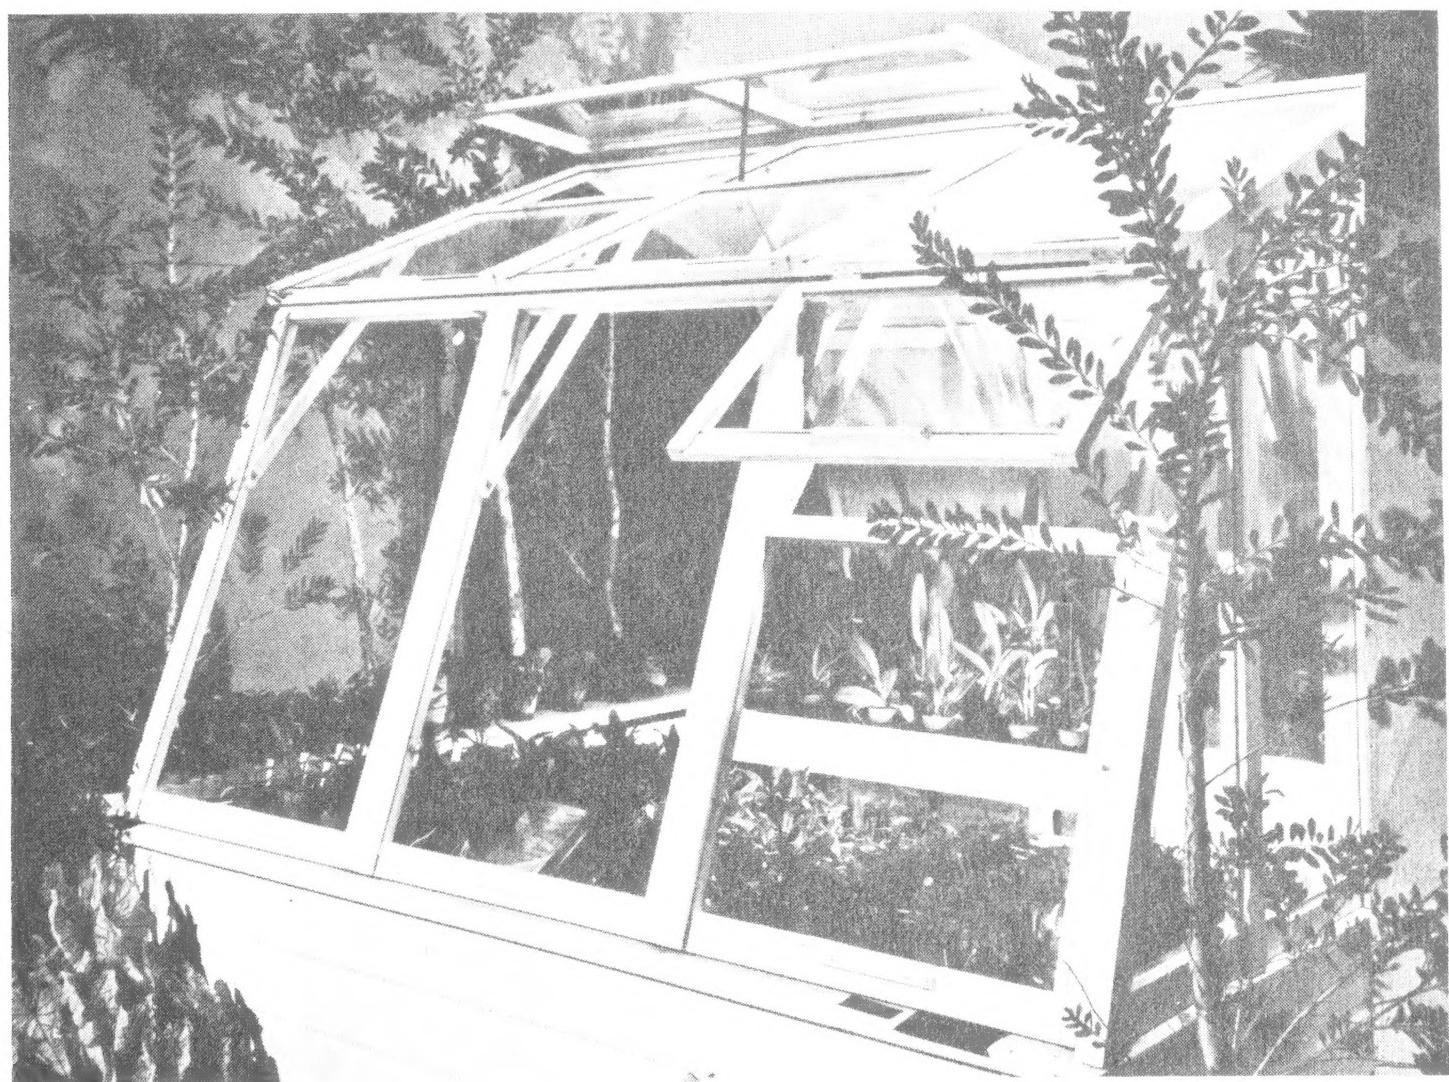

Exhibit of Unflowered Seedlings shown by ORCHIDGLADE at Sixth International Orchid Show, Miami, Florida, 1950. Awarded Bronze Plaque.

2½" SEEDLINGS

1 plant \$3; or 6 plants of any one cross for \$15

- No. 177 C. FABIA X (LC. ELISSA X LC. VALENCIA)
Elissa x Valencia is outstanding for its fine dark flowers measuring about 8" in diameter. In combination with Fabia, excellent dark progeny should develop. Fall flowering.
- No. 184 BLC. NANETTE X C. WHITE EMPRESS, F.C.C.
Blc. Nanette is one of the outstanding white Blcs., and a picture of it appears in Stuart Low's catalog. The Nanette used in this hybrid shows no color in the labellum. An extremely valuable hybrid of fine quality for winter flowering.
- No. 186 C. ARDMORE X LC. MODEL, MOREDA, F.C.C.
Two parents of outstanding quality. This will be a wonderful dark hybrid to flower February, March and April. This hybrid should not be overlooked.
- No. 191 LC. EDNA RICHTER X C. MOSSIAE
We expect this to be an outstanding flower for Easter.
- No. 195 C. TRIUMPH X LC. JACQUINETTA
This should be a fine dark Cattleya and one which we expect may flower on each new growth it makes. It will be one which will have a fine production record, producing as many as four to six flowers per stem.
- No. 196 LC. SAM HOUSTON X (LC. PAMELA X C. GATTON RUBY)
The wonderful parentage in this seedling will produce fine dark flowers. Winter.
- No. 325 LC. CASSANDRA, F.C.C. X C. TRIANAEI, THE PREMIER
Some good exhibition flowers may be expected from this hybrid; dark. The Trianaei used here is a very dark one. Christmas and New Year's.
- No. 332 LC. GEORGE BALDWIN (Lc. Princess Margaret x C. Enid, Orchidhaven)
A remake of the well-known new hybrid of outstanding quality without which no collection is complete. Flowers well formed and of heavy texture. Flowering season is predominantly fall, but we find plants of Lc. George Baldwin flowering nearly every month of the year here in Miami.

ADULT CATTLEYA TYPES

Our collection of mature plants contains many of the finest hybrids, but too great in number to make a listing of any particular crosses. However, we shall be glad to quote prices on any size or quantity of mature plants according to your needs. We invite correspondence.

PHALAEONOPSIS

Many of the Phalaenopsis listed here are outstanding crosses which will produce Show Flowers. In an effort to aid our customers in making their selections, the merits of each cross have been indicated—whether it is outstanding for its decorative value, as a cut flower, or some other characteristic.

We wish to call your attention, particularly, to the beauty of the pink-flowering hybrids and to remind you of their value as a decorative plant. The flowers on a spike of a pink-flowering hybrid open within a period of two weeks and then remain in flower for from six to eight weeks, depending upon the care given them. With the white-flowering Phalaenopsis hybrids, the buds open more slowly and the flowers which opened first (at the lower end of the spray) wither before all the blooms have opened. However, the white-flowering hybrids are in greater demand for cut flowers.

No. 188 P. DORIS (P. Elisabethae x P. Katherine Siegwart)

This is one of the finest of the Phalaenopsis on the market today. Flowers are large, white, and some have tints of pink on the back of the petals and sepals. See photo. Flowering size, \$35.00

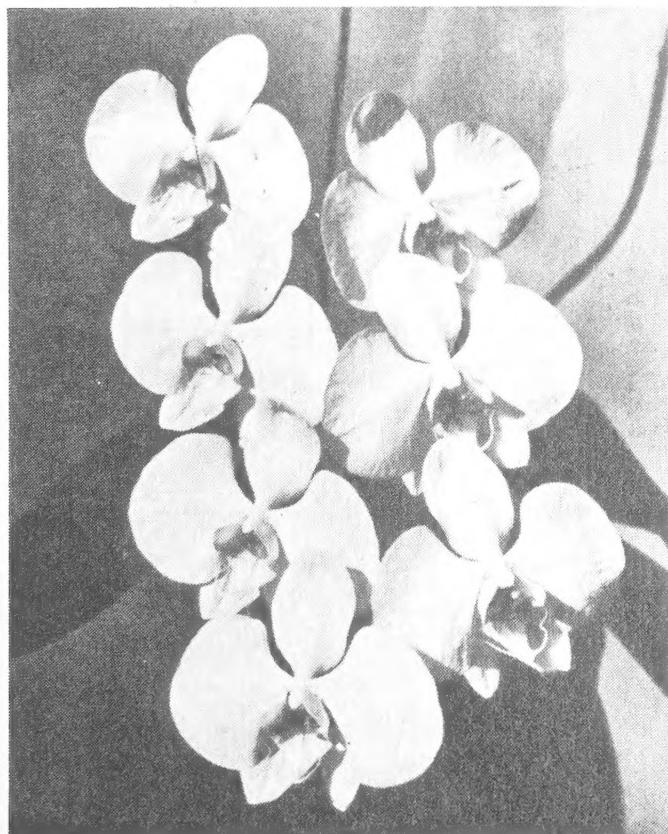

No. 208 P. DAVID BOY (P. Schilleriana, Walter Jones x P. Doris)

We consider this to be one of the finest of the light pink hybrids; flowers are of perfect form. The Schilleriana used here has dark pink flowers of heavy texture and fine form; for several seasons in succession it has produced over 140 flowers per spray each year. The Doris used to make this hybrid was $4\frac{1}{2}$ " in diameter and backs of sepals and petals were flushed with pink. In February, 1950, this hybrid flowered for the first time, and at the Sixth International Orchid Show in Miami, it was awarded the South Florida Orchid Society's Silver Trophy for the best seedling flowering for the first time. See photo. Limited supply.

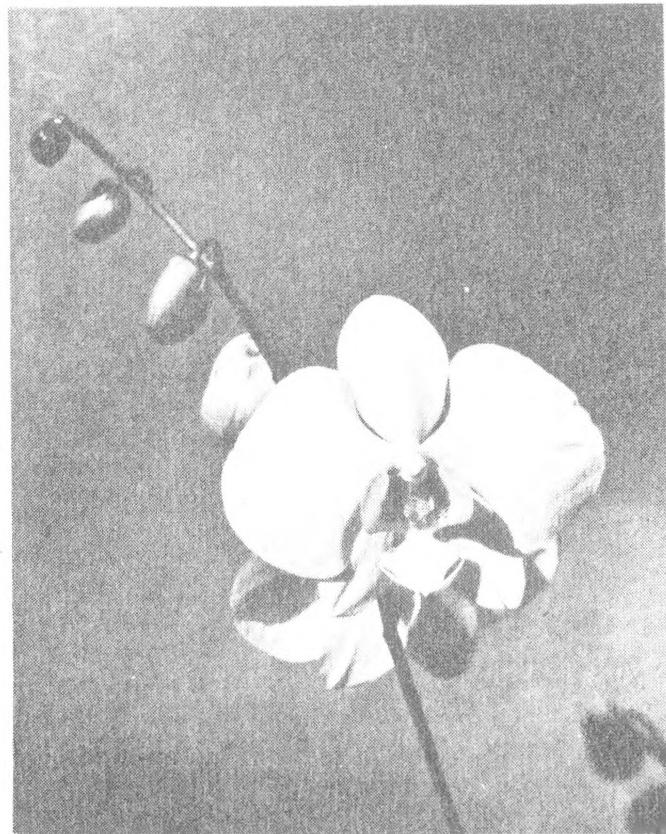

Flowering size plants, \$25.00

No. 268 P. FONTAINEBLEAU, PINK RUFFLES X P. DORIS

Large pink flowers of good dimensions; very similar to cross No. 208.
2" \$3.00

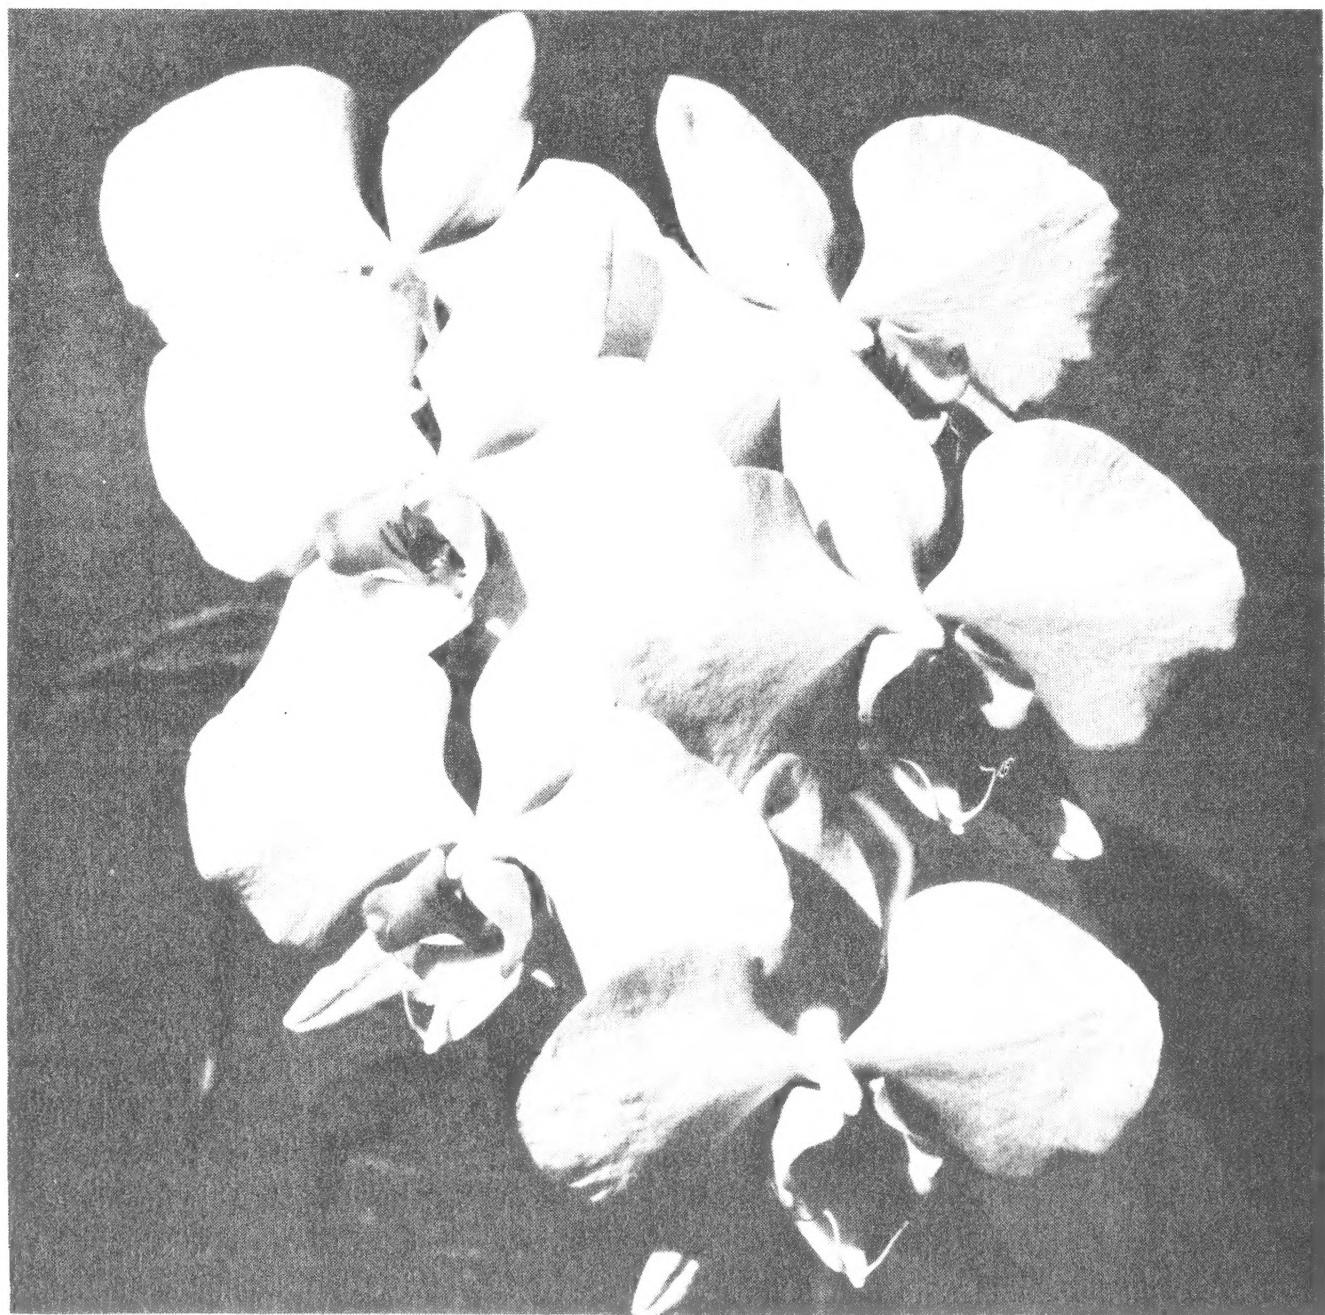

Phalaenopsis Doris

No. 208 Phalaenopsis David Boy

- No. 271 P. ELINOR X P. KAALAWAI
A fine pink hybrid; flowers should be large and have excellent form.
Wonderful decorative value. 2" \$2.00; 2½" \$4.00; 3½" \$6.00
- No. 272 P. HONOLULU X P. KAALAWAI
Another fine pink hybrid. P. Honolulu produces sprays of flowers several feet long. Excellent for decoration. 2" \$2.00; 2½" \$4.00; 3½" \$6.00
- No. 281 P. DORIS X P. NALUKEA
A fine cross using two white parents of excellent form. 2" \$2; 2½" \$4
- No. 282 P. PAMELA X P. MONIQUE
Last season when we offered this cross in 2" pots, we advised our customers we thought it had good possibilities. During the early part of February, 1950, we flowered this hybrid for the first time. The largest plants were in 3½" pots and produced flowers nearly 4" in diameter. We believe this hybrid will produce flowers 5" across or better on mature plants this coming season. See photo.
2" \$2.00; 2½" \$4.00; 3½" \$7.50; 5" \$12.50
- No. 333 P. DORIS X P. TETRAPLOID
The Doris used here was pure white, of excellent form, and measured 5" in diameter; it was crossed with a white Phalaenopsis (unknown parentage) of exceedingly heavy texture. The flowers of this hybrid will have great merit for lasting quality, size and conformation.
3½" \$12.50

No. 282 *Phalaenopsis Pamela x P. Monique*

- No. 334 P. VENUSTA X P. VENUSTA
 A beautifully-formed white flower of outstanding quality. We have bloomed one plant and indications are that this hybrid will produce some fine Exhibition Flowers. $3\frac{1}{2}$ " \$12.50
- No. 384 { P. KAREN (P. Katherine Siegwart, Helvetia x P. Doris)
 No. 385 Large white flowers of heavy texture; a fine hybrid for cut flower production. 2" \$2.00; $3\frac{1}{2}$ " \$7.50
- No. 387 P. KATHERINE SIEGWART, HELVETIA X SELF
 Large white flowers of heavy texture. We believe that having selfed Katherine Siegwart, some flowers superior even to the fine parent will develop. 2" \$2.00; $2\frac{1}{2}$ " \$4.00
- No. 388 { P. DORIS X SELF
 No. 389 Although the majority of the flowers from this cross will be white and some will be of exceptional quality, we expect some light pink flowers to appear. Even though of an experimental nature, these crosses are well worth a trial. 2" \$2.00
- No. 390 P. KATHERINE SIEGWART, HELVETIA X P. RIMESTADIANA, HELVETIA, A.M.
 We expect very large flowers of extra-heavy texture; a fine cut flower for lasting qualities. 2" \$2.00
- P. RIMESTADIANA, HELVETIA, A.M. X SELF
 A white Phalaenopsis of very heavy texture. Flowers are not as round as P. Doris but have more substance. Flowering size, \$25.00

INDOOR CULTURE

If you are interested in the culture of orchids in the home, please ask for our reprint, ORCHIDS FOR THE LIVING ROOM. (Reprinted from the American Orchid Society BULLETIN.)

DENDROBIUMS

This genus contains some of the finest of the spray orchids. They are of easy culture, although one must be aware of the particular requirements of each species in order to be successful in flowering them.

Dendrobium phalaenopsis and all of its varieties should be grown in the Cattleya house and given as much sun as possible without burning the foliage. Give the plants plenty of water when they are growing. When not in growth, withhold some of the water and give only enough to keep the plant from shriveling. Weak applications of liquid fertilizer are advantageous when the plants are in growth.

DENDROBIUM PHALAENOPSIS

An evergreen type of Dendrobium. Flowers are produced on sprays from the terminal end of the long canes. Lavender. Flowering size, \$7.50

No. 168 D. PHALAENOPSIS VAR. DELICATA
 A lighter shade than the above; background white with lavender to purple suffusion on sepals and petals. September to January. Flowering size, $3\frac{1}{2}$ " pots, \$12.50

D. PHALAENOPSIS VAR. DELIGHTFUL

Flowers very light; background white with less intense coloring than the variety "delicata." September to January. Flowering size, $3\frac{1}{2}$ " pots, \$15.00

D. PHALAENOPSIS VAR. SCHROEDERIANUM (Dixon's var.)
 The finest variety of Dendrobium phalaenopsis we have ever seen.

Flowers extremely dark; in some cases the sepals are tipped with white making a beautiful contrast. Canes grow to 8 feet in height and produce sprays of over 20 flowers which last for weeks. Our stud plant produced 10 sprays of flowers last season. An excellent plant for use as decoration or for cut flowers. September to January. Flowering size, \$25.00-\$35.00

No. 254

D. SUPERBUM

Flowers are borne along the pendulous stems; very showy. Hybrid between the dark type and the white variety, Burkei. Rapid grower. Ideal to grow or hang on a wall because of its pendulous canes.

2" \$1.50; 2½" \$2.50

ONCIDIUMS

ONC. AMPLIATUM VAR. MAJUS

Many-flowered arching, branched scapes from 2-4 feet long. Canary-yellow "dancing girls" 1½" in diameter, sepals blotched with red brown.

Flowering size, \$10, \$12.50, \$15

ONC. CEBOLLETA

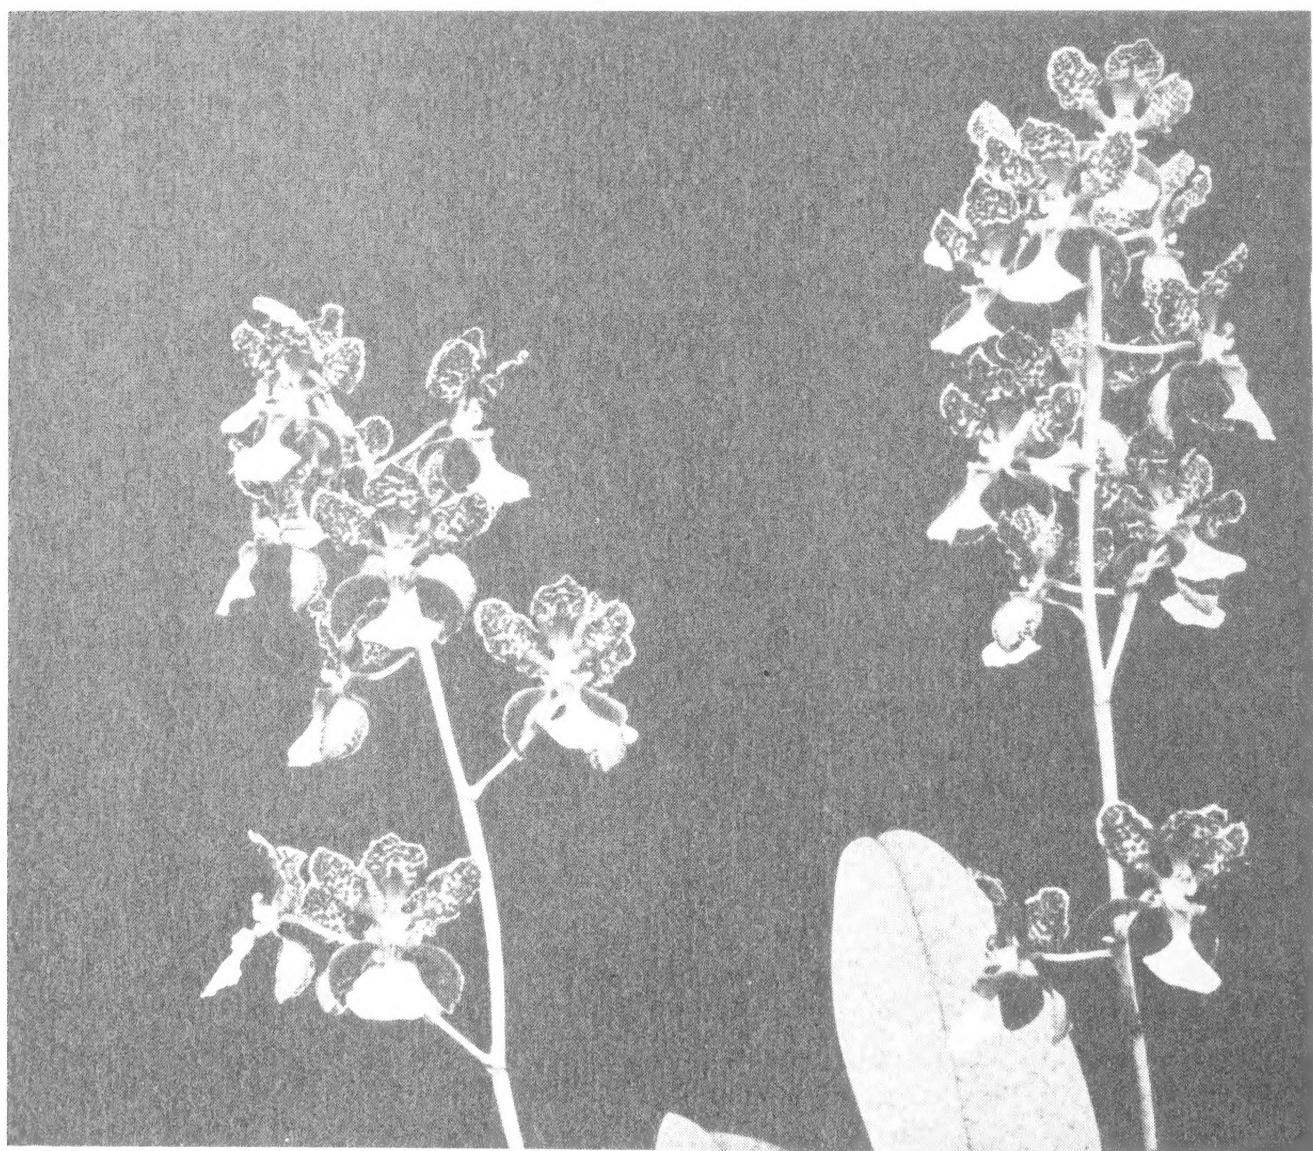

Flowers from 1-1½" in diameter, wavy, yellow spotted with reddish brown; lip bright canary yellow, three lobed. A many-flowered species with blossoms borne on branching flower scapes 15-30" high. Flowers for several months. January-February-March.

Flowering size, \$3.50-\$5.00

ONC. KRAMERIANUM

Flowers look like large butterflies — yellow with reddish brown. Will continue to flower from same spike over a long period.

Flowering size, \$7.50

Oncidium Lanceanum

ONC. LANCEANUM (from seed) No. 100

One of the finest species of the genera. Leaves large, light green, peppered with dark dots. Flowers chartreuse spotted with chocolate brown; extremely heavy texture and will last for a month. Excellent as a decorative plant and for cut flowers. $2\frac{1}{2}$ " \$5.00; Flowering size, \$25.00

ONC. SPHACELATUM

Small yellow flowers on long racemes; one plant will produce several hundred flowers. Easy culture and ideal to grow outdoors in warm climates.

Flowering size, \$7.50

MISCELLANEOUS

CATTLEYA SKINNERI species

Clusters of mauve flowers 3-4" in diameter. Easy culture; prefers plenty of sunlight. February-March.

Flowering size, \$5.00

CATTLEYA TRIANAEI species

Mauve flowers. December-January.

Flowering size, \$5.00-\$10.00

CATTLEYA LABIATA species

Large dark lavender flowers. Vigorous grower. Blooms September-October-November.

Flowering size, \$5.00-\$10.00

CATTLEYA MOSSIAE species

Flowers large, very variable and handsome. Sepals and petals light rose, lip crimson and rose with yellow markings.

Flowering size, \$5.00-\$10.00

LAELIA ANCEPS

Color variable, but typically, flowers are 3-4" across with sepals and petals deep rose, lip crimson purple.

Flowering size, \$5.00

CALANTHE VESTITA VAR. RUBRO-OCULATA species

Flowers about $1\frac{1}{2}$ " in diameter characterized by a bract at their base. Sepals and petals creamy white, nearly equal and spreading. Front lobe of lip more or less three cleft, white, and centrally blotched with crimson. Early Winter.

Flowering size, \$5.00

CYCNOCHES CHLOROCHILON species (The "Swan Orchid")

The genus is allied to Catasetum and Mormodes. Large yellow green, fleshy flowers, lip creamy white with a blotch of black green at the base.

Very interesting flower. Summer.

Flowering size, \$5.00

CYPRIPEDIUM HARRISIANUM (barbatum x callosum)

(The "Lady Slipper Orchid")

Petals and pouch reddish brown; dorsal green, heavily lined and barred with chocolate brown. Tessallated foliage. Easy culture; requirements same as for Phalaenopsis. Winter.

Flowering size, \$10.00-\$15.00

EPIDENDRUM ATROPURPUREUM VAR. RANDII

Rare. Flowers are larger than in type; sepals and petals brown with lighter borders; lip reddish mauve. Early Summer.

Flowering size, \$7.50-\$10.00

GRAMMATOPHYLLUM MEASURESIANUM (formerly called grandiflorum)

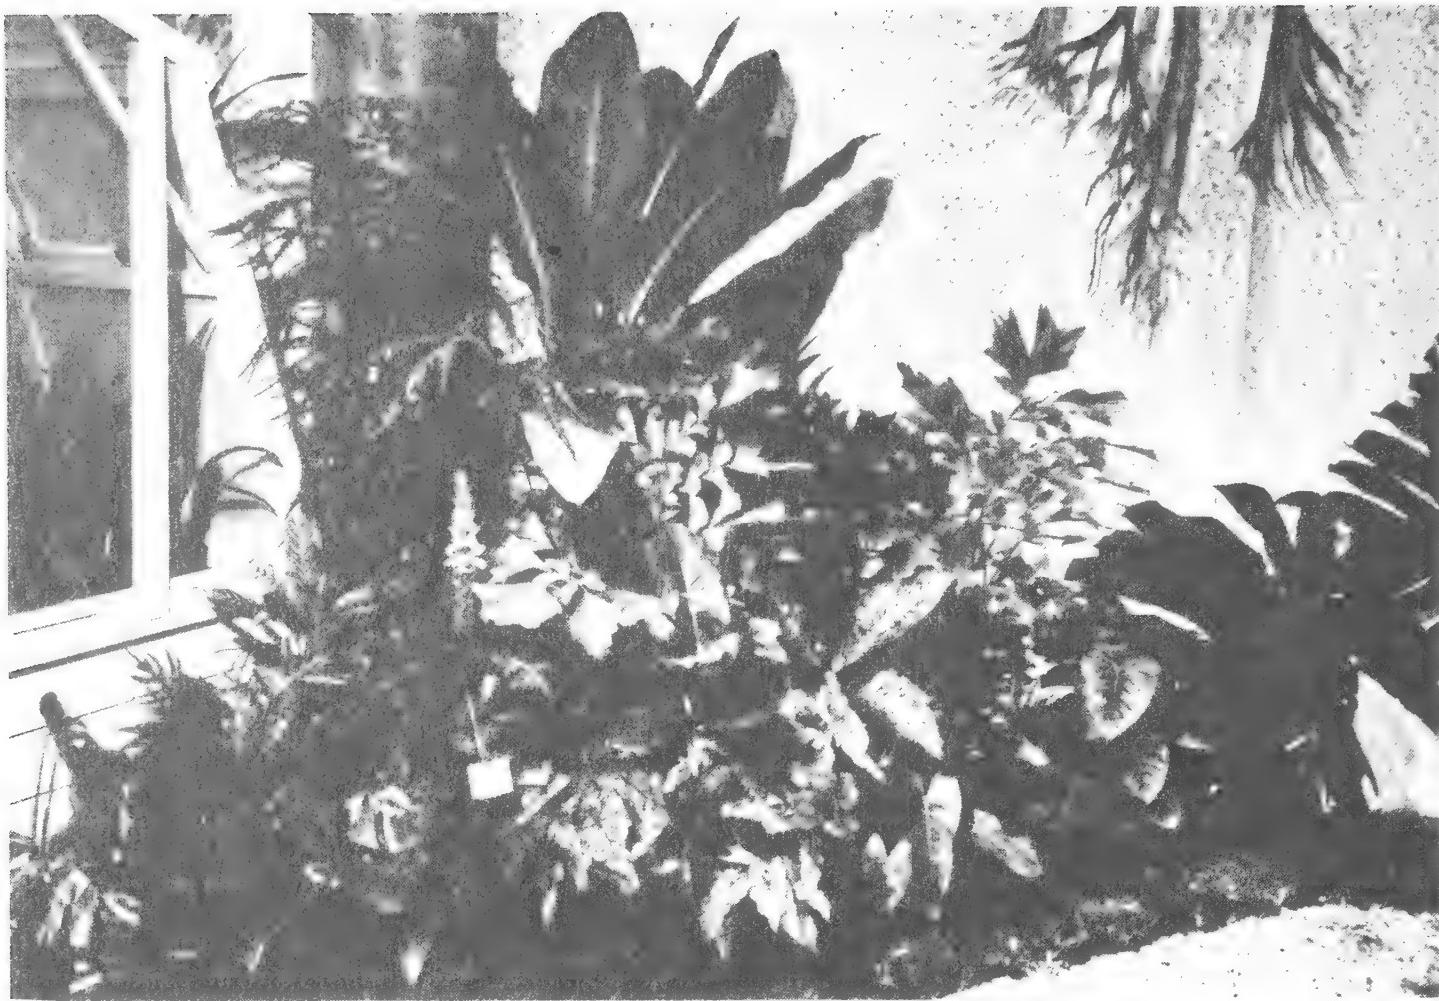

Flowers to 4-5" borne on long graceful sprays. Sepals and petals bright green blotched with purplish chocolate, lip marked with purple. Very rapid grower and a truly wonderful decorative species. A fine subject to grow outdoors in warm climates.

4" \$5.00

VANDA TRICOLOR, BROADVIEW X V. MEM. T. IWASAKI (No. 275)

This should make a beautiful predominantly yellow-colored hybrid. V. Mem. T. Iwasaki is a hybrid between V. Dearei and V. tricolor, which is a fine yellow of medium size. V. tricolor var. Broadview is a rich orange-yellow flower spotted with brown markings. Both parents were of heavy texture and good round shape.

$2\frac{1}{2}$ " \$2.50; 3" \$4.00

Display of Ornamental Foliage Plants exhibited by ORCHIDGLADE at Sixth Annual International Orchid Show, Miami, Florida, 1950.

ORNAMENTAL FOLIAGE PLANTS

We strongly recommend to you these outstanding foliage plants for decorative purpose in your orchid houses. The use of foliage plants tends to bring out the exotic beauty of your orchids when they are in bloom, and also add charm to your greenhouse when flowers are at a premium. The majority of the foliage plants which we offer in this list are the rare types and are well suited for greenhouse, conservatory or indoor culture.

ANTHURIUM CRYSTALLINUM

This is one of the most beautiful of all the foliage plants; leaves are large, cordately shaped, and a soft velvety green with silver veination. An ideal plant to hang over an aisle, and will add greatly to the charm of your orchid collection. See photo. 4" \$5.00

ANTHURIUM CARIBBEA

The leaves are heart shaped, dark green and heavy textured. Will do well in an abundance of light or low light intensity. Excellent for interior decoration. 4" \$4.00; 5" \$7.50

BROMELIADS

A group of foliage plants commonly called "Air Plants." Very interesting color combination in both foliage and flowers. Extremely hardy as an interior plant and require little care. \$1.50-\$10.00

EPICEA

A close relative of the St. Paulia (African Violet) and requires the same culture; flower brilliant red. Very decorative as a hanging plant. \$1.50

HOYA-CARNOSA VARIEGATA

A most attractive small vine which can be trained on a trellis. Flowers are star shaped and very waxy. Leaves variegated. \$1.00

MONSTERA DELICIOSA (synonym *Philodendron pertusum*)

Very satisfactory plant for conservatory or interior. Large green leaves perforated with large holes and cut-leaf margins. 4" \$2.00

PLATYCYERIUM SPECIES

This is one of the most beautiful Staghorn Ferns we have had the pleasure to see. Fronds grow to 4' long and the sterile fronds form a beautiful shield. Grown on plaque of Spanish Cork Bark. Excellent to hang on wall in greenhouse or conservatory. \$25.00-\$35.00-\$50.00

PLATYCYERIUM ALCICORNE

Fronds not as long as with the above species, but a very lovely plant. \$10.00-\$15.00

PHILADENDRON CORDATUM	4"	\$1.00
" HASTATUM	4"	2.00
" IMBE	4"	2.00
" ERUBESCENS	4"	1.50
" TRIFOLIUM	4"	2.00
" ANDREANUM	Price on application	
" MANDIANUM	4"	2.50
" PANDUAEFORME	4"	2.50

SPATHYPHYLLUM

Can be grown under the bench. Foliage dark green; greenish-white "Anthurium-like" flowers produced in the spring months. Good decorative plant. 6" \$3.50

If you do not find among the plants listed here the ones which you are particularly interested in obtaining, please let us hear from you, as we have quantities of types of ornamentals not listed, and will be glad to make further quotations.

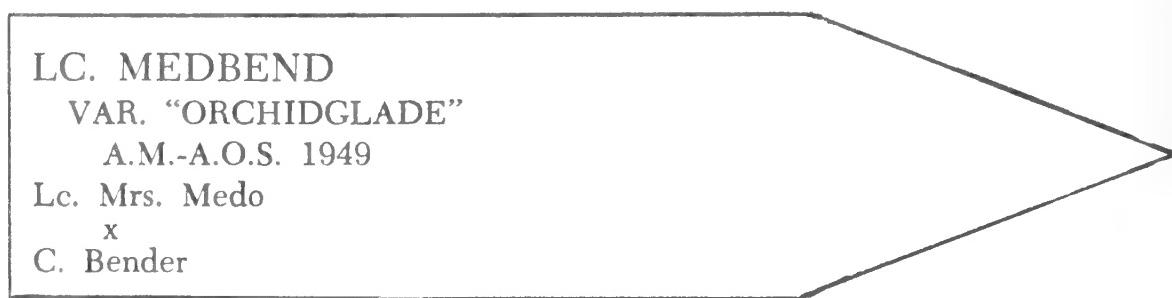

Anthurium crystallinum

“PYRALIN” ORCHID LABELS

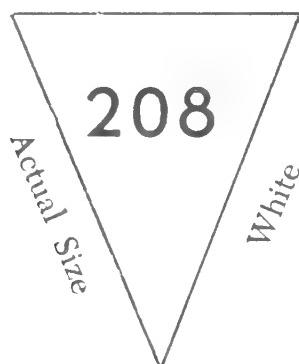

Make Permanent Accurate Records

By using these indestructible “Pyralin” labels to identify your orchid plants, you will increase the value of your collection immeasurably.

CONDITIONS OF SALE

1. Orders will be filled in rotation.
2. No substitutions will be made on any order either as to size or variety without authorization.
3. We do NOT make a packing charge.
4. Unless otherwise advised, shipment will be made via Railway Express, charges collect. (All orders are f.o.b., Miami.) However, we recommend Air Express (or Air Freight on large orders) for shipments destined for countries outside of the United States and for shipments to be made during the winter months when there might be danger of the plants freezing en route.
5. Claims for damaged shipments must be filed immediately with the carrier by the consignee. We make every effort to pack carefully, and our responsibility ends when the shipment is accepted by the carrier.
6. On the authority of your local Plant Quarantine Station, please advise us if there are any unusual requirements pertaining to the shipment of plants into your territory or country.
7. Our firm has been properly authorized to handle shipments to Hawaii. However, the customer must forward with his order his Permit Number which he must obtain from the Board of Commissioners of Agriculture and Forestry, Honolulu.
8. Unless your credit has been established with us, kindly enclose check, money order, or bank draft to cover payment of your order in full.
9. **NON-WARRANTY:** We, JONES AND SCULLY, INC., give no warranty, express or implied, as to the productiveness of any of the plants we sell, and will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of these plants.
